### Personal Statement

I am a dedicated individual and always aiming to produce work to a high standard. During my time at University I have averaged 1<sup>st</sup> every year, further testifying to my eagerness to do well. Currently I am looking for an organisation which will provide me to the platform start my career as UI/UX designer and help me to become an overall digital designer in my professional career development.

I have an experience working in a fast-paced environment, organizing tasks under pressure and working towards deadline. Being highly self-motivated by nature has allowed me to gain a detailed introduction and understanding of Multi-Media computing, which I have been able to improve on through work experience and taking on personal projects.

### Key Skills

- **Programming languages:** Java, C#, HTML, JavaScript, JQuery, CSS.
- Excellent knowledge of Microsoft Office Package specially Excel formulae function
- Solid understanding of front-end development strong knowledge of HTML5, CSS3, JavaScript, Bootstrap.
- 3D modelling and animation (3Ds Max, Maya, zBrush, motion-builder, Unity)
- Adobe Creative suite (Photoshop, illustrator, InDesign, After Effects)
- Motion Graphics
- Conversant in Windows, Mac and Linux OS
